

Last Update: 2/12/2024

Project Name: 2024 Pavement Preservation Project

Project Update:

The contractor is scheduled to begin work on the roadway in mid-April and be completed in the summer of 2024.

Expected traffic impacts:

Expect roadway closures as needed for a day at a time. Please use alternative routes.

Project Overview:

This preservation project will be treating many of the pleasant grove City roadways with a surface treatment that will seal the roads and provide a wearing course. The newer roads will receive a micro surface treatment that will help prevent the roadway from deteriorating therefore extending the life of the roadway. The older roads will receive a 3-part treatment. First the project will place a thin layer of asphalt to correct drainage concerns and major ride quality issues. Second, a scrub seal will be placed to seal the road and cracks. This will look like gravel and will remain in place for about 2 weeks. Third, a micro surface will be placed to provide a second layer of a sealer and wearing course that will provide a nice smooth final surface.

Project Area:

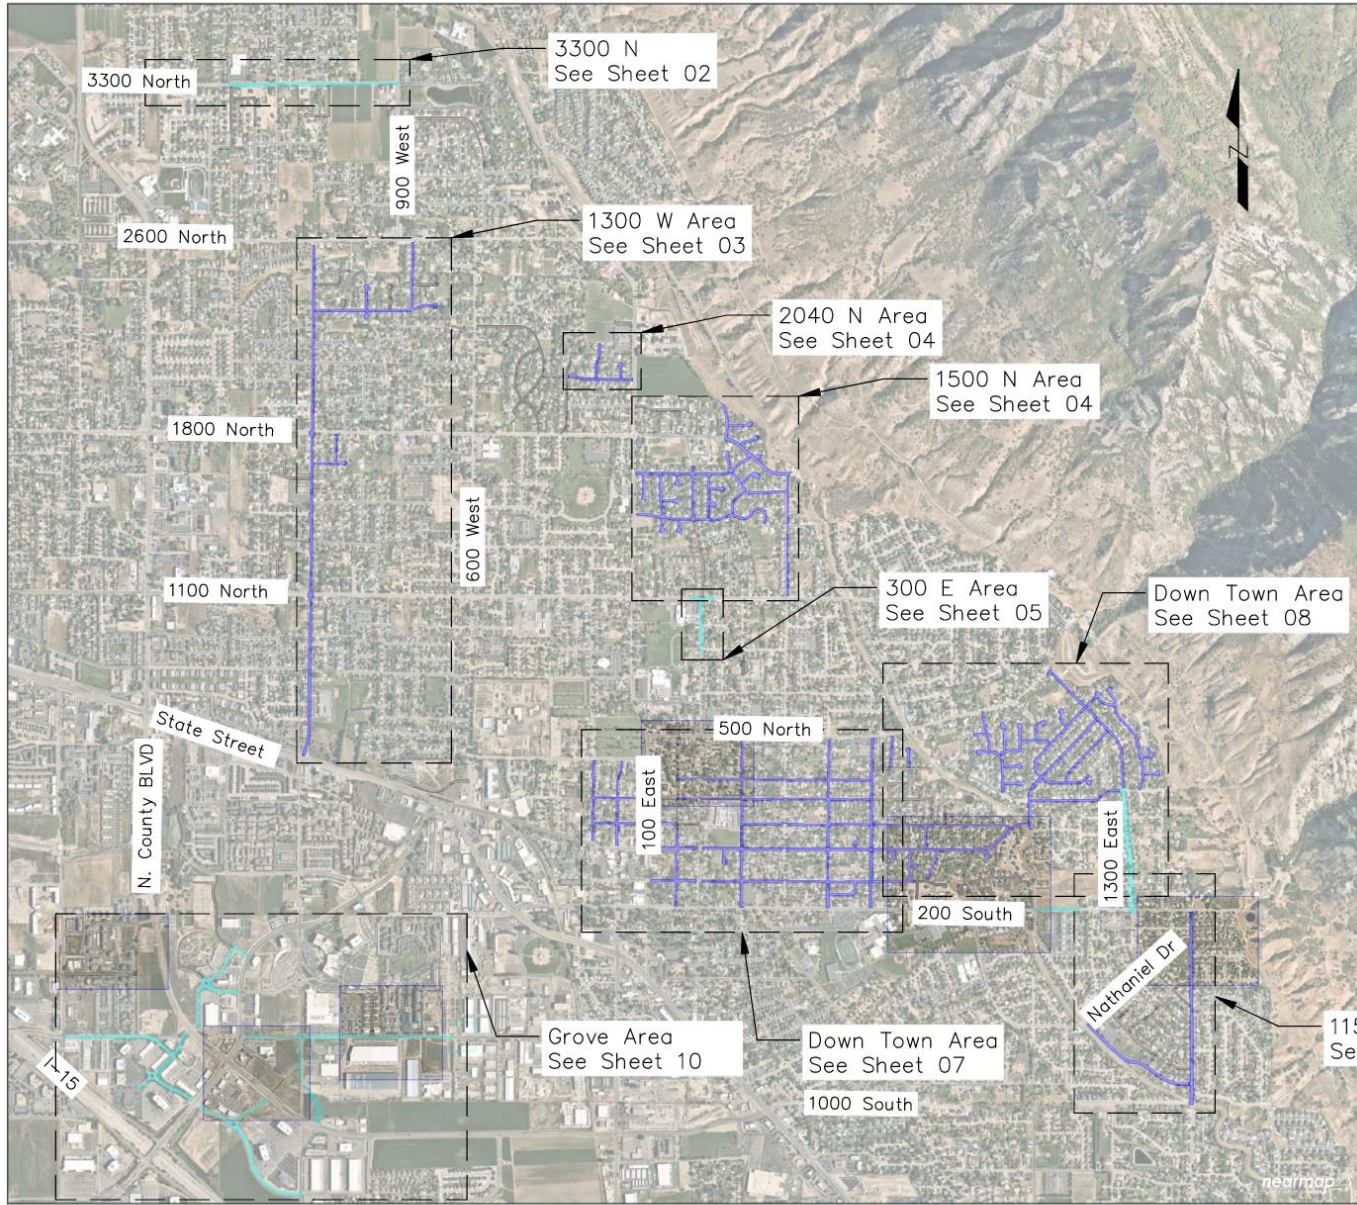

See attached page.

Contractor Contact Information:

The contractor on this project is Geneva Rock Products, Inc. The project manager is Russell Boyce whom can be reached at 801-592-3563.

Questions:

Please contact the Pleasant Grove Public Works Department at 801-785-2941 with comments or questions related to this project.
